APPOINTMENT

2022 – **London School of Economics and Political Science (UK)**
Assistant Professor in Finance
2024 – **CEPR Research Affiliate**, Banking and Corporate Finance
2026 – **J-PAL Invited Researcher**, Digital Identification and Finance Initiative

EDUCATION

2016 – 2022 **Columbia University, Columbia Business School (USA)**
PhD in Finance and Economics
MPhil in Finance and Economics (GPA 9.3 out of 10)

2018 – 2020 **MIT, Economics Department and Governance Lab (Kenya and Online)**
Courses in Development Economics

2012 – 2015 **European Business School (Germany)**
BSc in General Management (Top 2%)

2014 **National University of Singapore (Singapore)**
Exchange Semester

Other GMAT 770 (Top 1%)

RESEARCH INTEREST

Finance and Development, Household Finance, Corporate Finance, Financial Intermediation

PAPERS

1. **Shadow Banks on the Rise: Evidence Across Market Segments**

Journal of Financial Economics, Conditionally Accepted

(with Pulak Ghosh, Nirupama Kulkarni, and Nishant Vats)

This paper examines the comparative advantages of shadow banks across market segments. Combining credit bureau data on retail loans in India with weather shocks as a proxy for credit demand, we show that Fintechs respond more in uncollateralized markets. In contrast, non-Fintech shadow banks exhibit stronger responsiveness in collateralized markets. Exploiting geographic heterogeneity in the adoption of digital payments, we identify technology as the key advantage for Fintechs. Leveraging four natural experiments, we document the significance of lower regulation for non-Fintech shadow banks. Our results suggest that the comparative advantage of shadow banks differs across market segments.

2. **Bank Presence and Health**

Review of Finance (2025)

This paper examines whether more bank presence in underserved areas can improve households' health. Leveraging a 2005 Reserve Bank of India policy and a regression discontinuity design, I demonstrate that five years post-policy, treatment districts have 27 more bank branches than control districts. This expansion increases household employment and access to savings accounts, enhancing health investments. On the health-care supply side, hospitals utilize more credit and expand services. Six years after the policy, households in treatment districts are 19 percentage points less likely to suffer from non-chronic illnesses in a given month. Chronic diseases remain unaffected.

3. **When Private Firms Provide Public Goods: The Allocation of CSR Spending**

Working Paper

(with Lucie Gadenne and Noémie Pinardon-Touati)

This paper studies how firms allocate their Corporate Social Responsibility (CSR) expenditures to inform the welfare effects of corporate contributions to public goods. Using a novel dataset containing detailed information on the quasi-universe of firms' CSR projects in India over the period 2015–2019, we document key facts on the allocation of CSR spending across social topics (e.g., health, education) and locations. We develop a new method to measure the technological proximity between firms' production technology and CSR topics using natural language processing, and find that firms spend more on topics in which they have a technological advantage. This is consistent with an efficient allocation of CSR expenditures across topics and the main rationale for CSR in the literature. Considering allocation across locations, however, we find that firms spend more in areas where social returns are likely lower. Overall, our results suggest that CSR mandates may be an efficient but inequitable way to increase public good provision.

4. Copayments and the Value of Health Insurance: Experimental Evidence from Uganda

Working Paper

(with Lorenzo Casaburi and Jack Willis)

How do copayments affect the benefits and costs of health insurance in low-income settings? We study this question in a field experiment in rural Uganda that varies copayments for hospital-based outpatient insurance. Insurance substantially increases the use of high-quality hospital care, improves health, and reduces reliance on costly coping strategies. Lower copayments generate larger increases in utilization, yet health and financial-protection gains are similar across copayment levels. Net benefits derived from treatment effects on health outcomes and insurer costs favor higher copayments. At the same time, households place substantially higher value on low-copayment insurance, underlining that optimal copayment design depends on jointly understanding treatment effects, insurer costs, and household demand.

5. Peer Effects in Deposit Markets

Working Paper

(with Naz Koont)

We provide first empirical evidence that consumer peer effects matter for banks' deposit demand. Using a novel measure that depicts for each county how exposed peers are to a specific bank in a given year, we tightly identify the causal effect of peer exposure on deposit demand through a fixed effects identification strategy. We address key empirical challenges such as time-invariant homophily. We find that a one percent increase in a bank's peer exposure leads to a 0.05 percent increase in deposit market share. This effect has become stronger over time with the rise of the internet and social media, which facilitate cross-county communication. Peer exposure is especially relevant for smaller banks and customers that have access to the internet.

WORK IN PROGRESS

1. Leveraging Community Knowledge for Credit Distribution

(with Lasse Brune, Dean Karlan, Natália Seimel, and Chris Udry)

Randomized controlled trial, endline survey completed

GRANTS AND AWARDS

2025	LSE Excellence in Education Award
2024	USD 96,000 research grant (Weiss Fund)
2023	USD 30,000 research grant (Columbia University)
2022	USD 3,000,000 randomized controlled trial (private donor)
2022	USD 1,162,000 randomized controlled trial (private donor)
2021	USD 900,000 randomized controlled trial (private donor)
2021	PhD Student Prize. CEPR European Conference on Household Finance
2021	Research Grant. Wheeler Institute for Business and Development
2020	Research Grant. Jerome A. Chazen Institute for Global Business
2020	Research Grant. Bernstein Center for Leadership and Ethics
2020	Best Paper Award. 4th Year PhD Competition, Columbia University
2016	Doctoral Fellowship. Columbia University

PRESENTATIONS

- 2026 Fourth Workshop on Markets and Intermediaries, University of Groningen
- 2025 Bocconi-CEPR Finance Conference, CEPR Public Finance Workshop*, CEPR Summer Conference on Financial Intermediation and Corporate Finance*, City University*, Columbia University*, EFA, EIEF*, FMA, Imperial College London*, Kellogg Innovations in Sustainable Finance Conference*, Sciences Po Sustainable Finance Workshop*, SFS Cavalcade*, University of Delaware*, University of Geneva*, University of Padova*, University of Zurich*, VDEV-CEPR-BREAD series*, World Bank*, Young Scholars' Webinar, Zurich Public Finance Conference on Developing Countries*
- 2024 European Bank for Reconstruction and Development, Frankfurt School, Indian School of Business, King's College London*, LSE, NBER Information and Competition in the Digital Economy, Oxford University Finance Department, PSE*, Queen Mary University*, Reichman University Finance Department, Tinbergen Institute*, University of London Economics Department, WAPFIN, WEFIDEV Conference on Finance and Development, WashU Finance Conference
